

Notice is hereby given pursuant to 20.6.2.3108 NMAC, the following Ground Water Discharge Permit applications have been submitted to the New Mexico Environment Department (NMED) for review.

DP #	Facility/Applicant	Closest City	County	Notice	NMED Permit Contact
1770	Kirtland Air Force Base Eric H. Froehlich Colonel USAF AFCEC/CZO 2050 Wyoming Boulevard SE Kirtland Air Force Base NM 87117-5270	Kirtland Air Force Base	Bernalillo	The New Mexico Environment Department (NMED) seeks public input regarding Kirtland Air Force Base's (KAFB) proposal to modify its Discharge Permit DP-1770. The proposal is to increase the volume of the discharge via land application from 200 gallons per minute (gpm) to 1000 gpm, and to expand the possible discharge locations from a single infiltration gallery to two possible infiltration galleries, and land application (beneficial reuse) to the Tijeras Arroyo Golf Course and unpaved roads requiring dust suppression. The applicant's stated purpose of the proposed modification is to permit KAFB to expand its Bulk Fuels Facility (BFF) contaminant plume remediation efforts by allowing additional methodologies to discharge generated fluids. All proposed discharge locations are within the boundaries of KAFB. The final discharge permit will ensure that contaminated groundwater is treated so that discharged waters meet all applicable regulatory drinking water standards. Potential contaminants associated with the contaminated groundwater plume include ethylene dibromide, metals and other petroleum hydrocarbons. KAFB is located on the following Townships, Ranges and Sections within Bernalillo County: T10N R3E Sections 24, 25, and 36; T10N R4E Sections 19, 20, 29, 30, 31, and 32; T9N R3E Sections 1, 2, 3, 11, 12, and 13; T8N R4E Sections 1, 2, 3, 4, 5, and 6; T9N R4E Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, and 36. Ground water beneath the site ranges from a depth of 202 to 709 feet. The total dissolved solids (TDS) concentration beneath the site ranges from a concentration of 160 to 1200 milligrams per liter. 1839	<p>Kirtland Air Force Base</p> <p>Eric H. Froehlich Colonel USAF AFCEC/CZO 2050 Wyoming Boulevard SE Kirtland Air Force Base NM 87117-5270</p>	Kirtland Air Force Base	Bernalillo	<p>The New Mexico Environment Department (NMED) seeks public input regarding Kirtland Air Force Base's (KAFB) application to discharge (<i>i.e.</i>, inject) up to a total of 1,000 gallons per minute of treated groundwater to up to five Class V underground injection control wells located within the boundaries of the facility. The applicant's stated purpose is to support KAFB's ethylene dibromide (EDB) groundwater contaminant plume Interim Measure (<i>i.e.</i>, initial remediation), an action associated with Bulk Fuels Facility release. The final discharge permit will ensure that, prior to injection, contaminated groundwater is treated so that discharged waters meet all applicable regulatory drinking water standards. Potential contaminants associated with the groundwater contaminant plume include EDB, metals and other petroleum hydrocarbons. KAFB is located on the following Townships, Ranges and Sections within Bernalillo County: T10N R3E Sections 24, 25, and 36; T10N R4E Sections 19, 20, 29, 30, 31, and 32; T9N R3E Sections 1, 2, 3, 11, 12, and 13; T8N R4E Sections 1, 2, 3, 4, 5, and 6; T9N R4E Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, and 36. Ground water beneath the facility ranges from a depth of 202 to 709 feet. The total dissolved solids (TDS) concentration beneath the facility ranges from a concentration of 160 to 1200 milligrams per liter.</p>	<p>Stephen Pullen steve.pullen@state.nm.us</p>
1155	<p>State of New Mexico Department of Transportation District 4 Service Center & Maintenance Yard</p> <p>Heather Sandoval Assistant District Engineer State of New Mexico Department of</p>	Las Vegas	San Miguel	<p>State of New Mexico Department of Transportation - District 4 Service Center & Maintenance Yard, Heather Sandoval, Assistant District Engineer, proposes to renew and modify the Discharge Permit for the discharge of up to 43,200 gallons per day of chlorinated solvent-contaminated groundwater and salt contaminated groundwater to a treatment and disposal system. Potential contaminants from this type of discharge include metals and total dissolved solids. The facility is located at 28 Bibb Industrial Drive, Las Vegas, in Section 3, T15N, R16E, San Miguel County. Ground water beneath the site is at a depth of</p>	<p>John Rebar john.rebar@state.nm.us</p>

	Transportation District 4 Service Center & Maintenance Yard P.O. Box 10 Las Vegas, NM 87701			approximately 8 - 30 feet and has a total dissolved solids concentration of approximately 420 milligrams per liter.

Provided the applicant has met applicable requirements, the New Mexico Environment Department (NMED) will propose for approval a Discharge Permit containing limitations, monitoring requirements, and other conditions intended to protect ground water quality for present and potential future use. Information in this public notice was provided by the applicants and will be verified by NMED during the permit application review process. NMED will accept comments and statements of interest regarding applications and will create facility-specific mailing lists for persons who wish to receive future notices. Questions, comments or statements of interest should be directed to the NMED permit contact at (505) 827-2900 or at the following address: Ground Water Quality Bureau, PO Box 5469, Santa Fe, NM 87502-5469.
